Product Lines

FAN BLADES

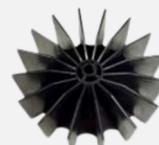

SIZE RANGE: 1.375" to 18.30" diameter

FEATURES: Maximum durability and high performance. A large inventory of existing molds saves development time and money. Many configurations including rotation, number of blades and different blade pitches.

IMPELLERS

SIZE RANGE: 1.87" to 4.75" diameter

FEATURES: High quality custom impellers to meet your specifications. Configurations include rotational direction and straight or backward curved blades.

BLOWER WHEELS

SIZE RANGE: 1.9" to 9.5" diameter

FEATURES: Offer high performance with low noise. Variety of sizes, shapes, designs and configurations. Applications include drying, cooling, suction and exhaust operations.

HOUSINGS

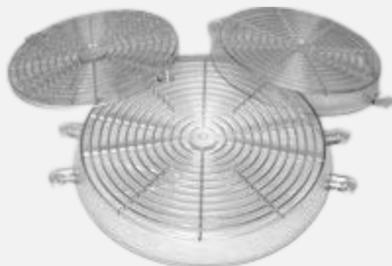

FEATURES: Optimize your system performance with a Beckett Air blower. Superior efficiency is the result of our design process which includes consideration of all performance factors (CFM, pressure and sound).

GAURDS & SHROUDS

SIZE RANGE: Custom

FEATURES: Offer maximum strength and airflow. Available in a wide variety of sizes, materials and designs.
